Subject Collaboration TUD and UNDIP

To the Rector of the Diponegoro University, Semarang Indonesia

This letter is to confirm that I, Associate Professor, Dr. Henk M. Jonkers, *Department of Materials, Mechanics, Management & Design (3MD), Faculty of Civil Engineering and Geosciences, Delft University of Technology, Delft, The Netherland*, will take part and fully support the cooperation with the Diponegoro University under the World Class University Program, Diponegoro University (UNDIP) 2021.

The cooperation will specifically concentrate on the following:

1. Research on the behaviour and sustainability of Reclaimed Asphalt Pavement (RAP) using the pyrolysis process for cementitious materials
2. Visiting Professor at the Engineering Faculty, Diponegoro University including experimental observations, data dissemination, stadium general, and guest lectures
3. Scientific paper writings and publications, involving authors from both the Universities
4. Sabbatical at the TU Delft for the academic staff of the Diponegoro University
5. Research initiation on the preparation of a research proposal for a government-to-government scheme research project on Life Cycle Assessment

This joint program is hoped to mutually enhance the academic relationship between the Delft University of Technology, Delft, The Netherland and the Diponegoro University, Semarang, Indonesia and strengthen the bond between The Netherlands and Indonesia

April, 2021

*Dr. Henk M. Jonkers*
